

Stop **paying** for empty disk space.

Amoeba removes the volumes you don't use and adds them back when you need them.
Real-time expand and shrink, without downtime.

Cut cost

Pay for what your workloads use, not what was provisioned for the peak.

Safe by design

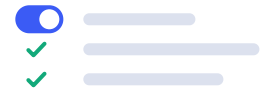

A disk leaves the pool only when it is empty.

Reliable

No code changes.
Resizes happen while you keep serving.

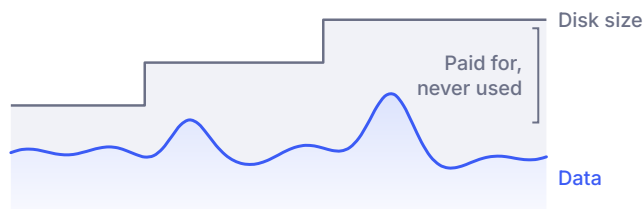

Full visibility

You decide what Amoeba manages, and see every change it makes.

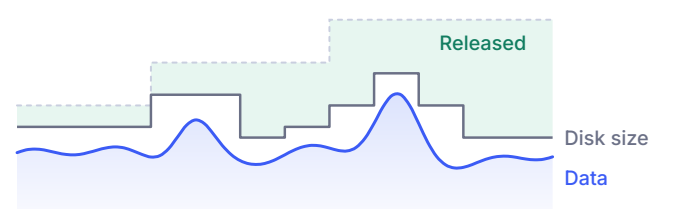

Cloud disks only grow. With Amoeba, storage grows and shrinks.

● With Amoeba

IMPACT · WORKED EXAMPLE, AZURE LIST PRICE

One VM, 840 GiB released.

COST BEFORE

\$292.88 /mo

COST AFTER

\$97.00 /mo

HOW IT WORKS

- 01 Onboard a Windows or Linux VM
- 02 Services restart at the switch
- 03 Then it resizes online

Find your own number.

Run the free assessment on your own VMs. It sends nothing anywhere.
